New Equipment:

Now I will register my Spare Flysurfer VMG2 21: 2021-3422-94856 & K-03939 & 10932

Reason:

In Race 16 (4th of Gold fleet women) me together with USA, GBR, Australia had a massive tangle at the topmark. My kite got stuck at the left tip in GBR and right tip in Australia for several minutes which caused damage at the material of the kite and also the bridles. The kite is not repairable as the whole kite got stretched as it was tangled inbetween two other kites for a long time. (pictures in „old kite“)

Response: Approved
