

RS21 World Championship 2025

Notice to Competitors

Number: 05

Minimum Weight Compliance and Inspection Procedure

Source: Technical Committee

Venue: Yacht Club Porto Rotondo

Published: 2025-09-23 10:17

Notice:

The Technical Committee, in accordance with the Sailing Instructions, hereby informs all competitors of the following:

1. Boats that, following the official weigh-in, were below 685 kg will be fitted by the Technical Committee with additional weights in order to reach the minimum required weight. Such weights shall remain in the front pocket of the gennaker bag and shall not be moved during racing.
2. After boats finish each race, the Technical Committee will carry out random weight checks to ensure compliance with this Notice and the Sailing Instructions. These checks may include:
3. On-water inspections after each race, to verify that the required additional weights are correctly placed on board.
4. Onshore re-weighing after the end of racing each day, with the boat in the same configuration as during the initial weigh-in, to confirm compliance with the minimum weight requirement.
5. All competitors are reminded to take due note of the above and to strictly comply with these requirements, in the spirit of fairness and sportsmanship.

Egidio Babbi
Chair, Technical Committee.
