

RS Tera World Championships 2022

Question for Officials

Date: 2022-08-03

Question No: 01

Question For: Technical Committee

Question:

I was on the last leg the reach to the finish in the 4th race today, race 7.

I was in 8th position and I am certain I would have finished in that position when my mast snapped off at deck level meaning I was unable to cross the finish line.

on inspection of the mast it did not have a sleeve inside to strengthen and stiffen it. it is a Selden mast provided by RS and new enough that it should have had a sleeve in it.

I would like to clame redress if it is possible as it was a substandard mast that was provided.

is that a possibility? and how do I do that.

I have shown the mast to rs and they agree the mast is below the standard that it should have been and said I should put in a form as it was seconds away from the finish line.

thank you Ffion
