## Question for Officials

**Date: 2026-06-12**

---

**Question No: 07**

**Question For: Race Committee**

**Question:**

Marks being used at this event are MarkSetBot marks.

The commanded positions of these marks are accessible by competitors if the RC releases the Event ID from MarkSetBot, as used at many top level racing events around the world.

These can be imported directly to some navigation software, or can be downloaded as a \*.gpx file into almost any navigation software, chart plotters and apps using this web URL:  
<https://www.fielddyachting.com/marksetbot>

This can provide a great benefit by removing the high risk exercise of pinging the start line etc.

Will the race committee advise the fleet of the MarkSetBot Event ID for all competitors to use to improve pre start safety and fairer racing?

---

**Answer:**

see the Notice n°1
