

SLVYRA Question

Date: 2019-07-04

Question No: 04

Question For: Race Committee

Question:

Not a question but an FYI. When the RC raises our flag for the start it's wrapped around the pole and we cannot see if it's our flag or not. Yesterday we heard the signal and looked at the flag all wrapped up around the pole and only when it started to unroll (10-15 seconds later) we saw that it was ours. This happens often and with the pole being so short sometimes it takes a while to unroll and it's hard to see. Two suggestions if I may... get a higher pole and be sure the flag is not wrapped around the pole when the pole is raised. Thanks

Answer:

Hi Paul, RC has been informed. They will try to do better.
