

2021 World Sailing Youth World C Question for Officials

Date: 2021-12-13

Question No: 02

Question For: Technical Committee

Question:

Is it necessary to fix the tow rope with tape in the bow of the 420?
At the 420 assembly, in the wc, Italy, this rule was eliminated.

Answer:

The latest Class Rule changes became effective at the 01/12/2021, including a change of C.5.2.b.1. considering the attachment of towing ropes.

The Class Rule C.5.2.b.1. valid from 01/12/2021 states; *'The boat shall be fitted with a floating towing rope of a minimum length of 8 m and minimum diameter of 8 mm, secured to the mast and stored inside one of the spinnaker bags.'*

So it is not required to fix the tow rope with tape at the bow.
