

## 2021 World Sailing Youth World C Question for Officials

**Date:** 2021-12-13

---

**Question No:** 03

**Question For:** Technical Committee

**Question:**

Can we use MC lube on parts of hull or sails

---

**Answer:**

NOR Addendum A.1.6 states for supplied Equipment: '... No wax shall be applied. Hulls, centreboards and rudders may be cleaned, but only with water and ordinary soap.'

Further the 29er Class Rules are closed class rules so 'where if it does not specifically say that you may - then you shall not'

The 29er class rules are not mentioning *lubricating* (ERS C.7.1.i) in C.7.1, C.8.1, C.9.1 or C.10.1, so the 'application of non-permanent friction reducing compound' is **not** permitted on *Hulls, Appendages, Rig and Sails*.
