

2021 World Sailing Youth World C Question for Officials

Date: 2021-12-13

Question No: 03

Question For: Technical Committee

Question:

Is it possible to attach tape in front of dagger BOARD lips and inside them to make them harder to loose, below water line?

Answer:

'One piece of adhesive plastic or fabric tape, not measuring more than 125mm in any direction, may be bonded to the hull over the forward end of the centreboard gaskets' as permitted by class rule C.6.3. For this purpose only it changes the restriction in NOR A.1.6 of 'above the waterline'. Please also see notice to competitors #4.
