7. Description Of Incident

I was coming in fast to the last gate mark before the finish. I had gone a little further to the cliffs and so was approaching on a tight angle on starboard gybe Right at the buoy. SUI 7721 had gybed on to port gybe about 15 lengths from the buoy. From this time I had an overlap. I was loudly hailing for mark room and also shouted for water as well in case of any language difference. SUI appeared to be leaving room but the closed the gap to about a Metre and I then hit him and the mark at same time. ITA 6897 was immediately behind me coming in at the same angle but some distance behind. There is some minor gelcoat damage to my bow where it hit 7721.
