## 7. Description Of Incident

7707 capsized on race 6 lap 3 tacking fro the windward mark.

7707 inverted

We monitored them and they were not able to right the boat and getting closer to the rocks on the west side of the lake.

We carried on to the windward mark and sought to wave down safety but there was NO safety on the windward mark for us to alert.

When rounding the spreader we left the race because we were growing more concerned of their well-being as they were drifting more and more into a dangerous position. We prepared to tow them off the rocks and ensure that they were ok. There was no safety headed towards them throughout this time. We covered them while they managed to right the boat and made sure they were ok. Safety boat arrived only when both helm and crew were ok. We were forced to retire because of this situation and the lack of response from the safety boats and would therefore like redress.
