**Scoring Inquiry:**

Hi

Aurora took part and completed the harbour race today finishing just ahead of J24 Headcase, but we've been scored DNC again. There was confusion over our different spinnaker number of 1578C.

Is it possible you are now looking solely for that number and not our main and jib correct number of 1039?

Hoping we can be reinstated .

Many thanks,

Oscar Chess

**Response Title:**

Corrected Score: 15:25:00

Results Updated. Apologies for that but we now have both numbers in the scoring application but the race officers can only record what they see. It is hard when you have a lot of boats at a regatta and boats with more than one number.

Please keep checking the results and querying them and we will be happy to fix any problems.

For future reference you should really fix the numbers to be consistent.
